Wrong:

Revised results - comments

As a number of you had problems with control 12 I decided to revisit on my way home, I also looked at the council website again and was confused when according to their site LP10 was at the path road cross roads which I wouldn't have expected any of you to select. The attached plan shows what was on the website (the red dots) and what was on the ground (the green dots), i.e. there are 2 more Lampposts than shown on the map. Control 8 was shown slightly south east of its actual position nearer to the location but the wrong side of the road to LP 9 . I have therefore accepted answers 8 and 9, my view is that LP 10 was next to a clear map and ground feature the path/road junction to be correct so I have not accepted it.
