Wrong:     

**Planner's Comments:** After weeks of intermittent rain, we were lucky on this evening that the miserable drizzle which had blighted the afternoon shuffled off and left 9 competitors with just large puddles and saturated grassed areas to contend with. The people struggled personfully, however, and everyone got back to the Finish in one piece without being unduly splattered.

I chose Bilton firstly because I had not “done” it before and secondly because I could base the Start/Finish at a reasonably sited pub, The Knox Arms. I was rewarded on both counts. Bilton is a large and varied area in terms of both road layout and topography. I felt able to set a challenging series of controls, taking advantage of the whole area, and possibly went overboard since the highest score on the night was some way short of the maximum available. Nevertheless, people seemed to have enjoyed themselves and there were a minimal number of wrong controls. The Knox Arms was also enjoyed by those who attended to sample the real ale.

On to Knaresborough on 20 Jan 16 when your planner for the evening will be Stan Appleton.

**Richard Kirk 8 Jan 16**
